

CONTENTS

SUMMARY	1
OPENING SESSION	35
Opening Address	37
<i>L. Michel</i>	
Opening Address	43
<i>Y. Amano</i>	
Opening Address	45
<i>B. Bigot</i>	
Fast Reactor Development and Worldwide Cooperation in the Generation-IV International Forum	51
<i>Y. Sagayama</i>	
PLENARY SESSION: NATIONAL AND INTERNATIONAL FAST REACTOR PROGRAMMES	59
Fast reactor development strategy in China	61
<i>Donghui Zhang, Yuanyu Wu, Hong Yu</i>	
The French R&D programme on SFRs and the ASTRID prototype	69
<i>C. Behar</i>	
A perspective on the Indian programme on fast reactors and associated fuel cycles	71
<i>P.R. Vasudeva Rao, P. Chellapandi, G. Srinivasan, K.K. Rajan, R. Natarajan, P.V. Kumar, T. Jayakumar, S.C. Chetal</i>	
Deliberation of post-3.11 fast reactor R&D strategy in Japan	85
<i>S. Kondo</i>	
Fast reactor development programme in the Russian Federation	93
<i>V.I. Rachkov, E.O. Adamov, A.V. Lopatkin, V.A. Pershukov, V.M. Troyanov</i>	
US research programme to support advanced reactors and fuel cycle options	103
<i>P.B. Lyons</i>	
Euratom contributions in fast reactor research programmes	113
<i>T. Fanghänel, J. Somers</i>	
OECD Nuclear Energy Agency activities related to fast reactor development	123
<i>T. Dujardin, N.T. Gulliford</i>	

State-of-the-art, new trends and developments in the field of fast reactors and related fuel cycles	137
<i>F. Carre</i>	

TECHNICAL TRACK 1:

FAST REACTOR DESIGNS: GOALS AND PATHS OF PROGRESS (Technical Session 1.1).....	139
Status of SFR development in the Republic of Korea	141
<i>Yeong-Il Kim, Jinwook Chang, Yong-Bum Lee, Chan-Bock Lee, Dohee Hahn</i>	
Enhancement of the JSFR safety design and criteria for the Gen-IV reactor	159
<i>K. Aoto, Y. Chikazawa, T. Ohkubo, K. Okada, T. Ito</i>	
Development of physical conceptions of fast reactors	175
<i>Yu.S. Khomyakov, V.I. Matveev, A.V. Moiseev</i>	
Future advanced nuclear systems and role of MYRRHA as a waste transmutation R&D facility	193
<i>H.A. Abderrahim</i>	
The French fast reactor programme: Innovations in support of higher standards	209
<i>F. Gauché</i>	
Overview of lead based reactor design and R&D status in China.....	219
<i>Yican Wu, Yunqing Bai, Yong Song, Qunying Huang, Hongli Chen, Gang Song, Liqin Hu, Jieqiong Jiang</i>	

TECHNICAL TRACK 2:

FAST REACTOR TECHNOLOGIES, COMPONENTS AND INSTRUMENTATION (Technical Session 2.1).....	231
The lead fast reactor: Demonstrator (ALFRED) and ELFR design	233
<i>M. Frogheri, A. Alemberti, L. Mansani</i>	
Development of fast sodium reactor technology in the Russian Federation	249
<i>B.A. Vasilyev, D.L. Zverev, V.N. Yershov, S.G. Katyakin, V.M. Poplavskiy, V.I. Rachkov, O.M. Sarayev</i>	

Manufacture and erection of SFR components:	
Feedback from PFBR experience	265
<i>P. Chellapandi, S.C. Chetal</i>	
Current trends for sodium fast reactor design options:	
An industrial perspective	281
<i>J.-P. Serpantie, J.-C. Lefevre, J.-M. Hamy</i>	
Overview of the US fast reactor technology programme	297
<i>R.N. Hill</i>	
Evaluation of severe external events on the JSFR	307
<i>H. Hayafune, A. Kato, Y. Chikazawa, T. Ohkubo, H. Sagawa,</i>	
<i>Y. Shimakawa</i>	

TECHNICAL TRACK 3:

FAST REACTOR SAFETY: POST-FUKUSHIMA LESSONS AND GOALS FOR NEXT GENERATION REACTORS

(Technical Session 3.1)	331
--------------------------------------	-----

Modern approaches to safety assurance of a new generation of sodium fast reactors	333
<i>I.M. Ashurko, A.A. Kamayev, V.M. Poplavskiy, B.A. Vasilyev, S.L. Osipov, A.I. Staroverov, S.F. Shepelev</i>	
Safety upgrading of the PFBR in the wake of the Fukushima accident:	
Severe accident management strategies	345
<i>P. Kumar</i>	
SFR safety considerations in light of the Fukushima Dai-ichi accident	355
<i>A. Yamaguchi</i>	
R&D challenges for SFR design and safety analysis:	
Opportunities for international cooperation	371
<i>N. Devictor</i>	
Sodium fast reactor safety and licensing research plan	385
<i>M. Denman, T. Sofu, R. Bari, G. Flanagan, J. Lachance, R. Wigeland</i>	
IAEA safety standards for fast neutron reactors and high temperature gas cooled reactors	401
<i>N. Tricot, P. Chellapandi, F. Reitsma, K. Tuček</i>	

TECHNICAL TRACK 4:

**FAST REACTOR MATERIALS:
ACHIEVEMENTS AND NEW CHALLENGES**

(Technical Session 4.1) 415

Development of structural materials for the JSFR: Overview and
current status. 417
T. Asayama, T. Kaito

Development of structural core components for breeder reactors. 433
N. Saibaba

Materials performance in sodium cooled fast reactors:
Past, present and future. 461
K. Natesan, M. Li

Achievement and new challenges for high performance materials
in Europe. 487
C. Fazio, P. Dubuisson

Materials options for the steam generator of
sodium cooled fast reactors 505
X.G. Fu, B. Long, L.Q. Han, B. Qin, J.Q. Zhang, S.X. Wang
